Federal Aviation Administration (FAA)
Designee Management System (DMS)

RELEASE OVERVIEW 5.7

Development for Designee Management System Program

Release Overview 5.7 External Users

COMMON TO SYSTEMS (External Users)

Area of Change	Description
External Update- Training Notification Update	When the designee receives a 'training due' notification, the subject line now says Designee <First Name, Last Name> has XX days to complete training.
External Update- Designee Home Page	When there is an action item for the designee, the action item will now have a hyperlink for ease of use.
External Bug Fix- Change Designation Location	Once a user submits a request to change designation location, the information cannot be edited while it's in the process of being approved. Added pop-up box stating user cannot submit another request.
External Update- Appeal Task	When a designee is terminated 'for cause' (able to appeal), the appeal activity is now added to the terminated designee's activity history.
External Update- Voluntary Surrender	When Termination is initiated, the Voluntary Surrender link will be disabled to the designee.
External Update- User Name	Added the ability to update user name under the Update Personal Profile tab for external DMS users.
Enhancement – DADE Post-Activity	Simplified the DADE post activity by removing the below fields: <ul style="list-style-type: none"> - Was there an instructor recommendation based on an FAA-approved aircraft dispatcher certification course? - Was additional instruction provided for a retest? -
DPE/SAE Training	Added SMFT training and updated recurrent training options.
Bug fix	Changed the DAR-T error message on a preapproval to read "activity" instead of "test."
Bug fix	Fixed an issue for DME and DPE completed post activity report. They were displaying the school name, but not the four-digit designator.
DPE/SAE Post Activity	Updated DPE/SAE Post Activity with additional fields: Type of Practical Test Airport of Primary Training
DPE/SAE Authorizations	Added a Special Medical Flight Test authorization
